## Skill set

The purpose of the illustration below is to showcase where my strengths lie. Skills at the max level indicate that I am strongest and most comfortable working with those.

### TypeScript

### Angular

### React

### C#

### .NET

### Jest

### Next.js

### Azure

### Kubernetes

### SQL

## About me

Throughout my journey as a student, mentor, and full-time developer, I have gained experience working in teams utilizing agile development methods such as Kanban and Scrum. My ability to work effectively in a team has earned me a reputation as a dedicated and proactive colleague. Additionally, I've gained valuable skills and knowledge in software development, design, programming, and testing, largely due to the guidance and support of my talented and experienced colleagues. For that, I feel blessed.

Regarding my technical experience I'll refer to the sidebar on the left.

## Education

2017-2020	<a href="#">Bachelor's Programme in Software Technology</a> Aarhus University - Finlandsgade 22, 8200 Aarhus N

## Language

- Danish - Fluent (Mother tongue)
- Engelsk - Fluent
- Persian - Conversant
- Cantonese - Conversant

## Recommendations

### Danske Bank - Anders Stensgaard (IT manager)

During his time, David contributed to the development of several solutions, helping Danske Bank fight financial crime. David has been showing a lot of energy and skill when developing full stack features to said solutions. In addition to showing a high degree of technical skill, he has also been handling the cooperation with the relevant stakeholders, showing great capability of managing all aspects of the development of a feature.

David has fitted very well with the team. He is always very helpful and has arranged several social events and contributed to having a fun and motivating workplace. I therefore give David my warmest recommendations.

### Danske Bank - Andreas Boye (Tech lead)

I had the pleasure of having David as an intern and student worker on my team. During his time here, I have come to know David as an employee who is very eager to learn and improve and does so on his own initiative. He has contributed a lot to the team both in terms of code and his fun spirit. David has delivered several full features involving frontend and backend code and has shown a great ability in aligning with stakeholders on those features. He has a good sense of humor and frequently takes initiative to social events big and small. I highly recommend David as a team member.

### Danske Bank - Søren Thule Madsen (IT manager)

I had the pleasure to have David as an intern and later a student worker in my development team.

David is at first a quiet guy, but behind this quiet outer layer is an eager, ambitious and deliberate person, who wants to learn, experiment and grow. David actively and independently takes his career in his own hands, and continuously work with his own development.

David quickly contributed to the team with value-adding code and features. He settles with the team, and promotes a culture where you dare to ask to learn. David also contribute to the team on a social level, where he spreads joy and laughter, and often takes initiative to social events.

David has the potential to take any department or company to the next new tech level, with his go-get attitude and hunger to learn about the next tech wonder.

I highly recommend David.
